About me

I create games in Unreal Engine 5 (C++/Blueprint). I have several completed projects under my belt - from a 2D platformer, through a co-op multiplayer, to a combat game with Gameplay Ability System. I'm looking for my first commercial experience in game development.

Tech

Unreal Engine 5

Unity

Visual Studio, Git, Blender, Aseprite

C++

C#

Blueprints

Projects

GASCrash (WIP) | UE5, C++, Blueprint | github

Combat game with full Gameplay Ability System implementation - custom ASC, Gameplay Tags in C++, Enhanced Input, ability slot system.

Platform Farmer | UE5, C++, Paper2D | itch.io / github

2D platformer with exploration mechanics, NPC trading and a day/night cycle.

Split-Bean | UE5, C++ | itch.io / github

3D co-op puzzle multiplayer game with 7 asymmetric levels.

The Bloodline Remains (WIP, team project) | UE5, C++

3D zombie survival horror developed in a team. Role: AI Programmer - behavior trees implementation, perception system, enemy state logic.
